

Veinlite PEDI®

Most effective device for finding and accessing veins in infants and neonates.

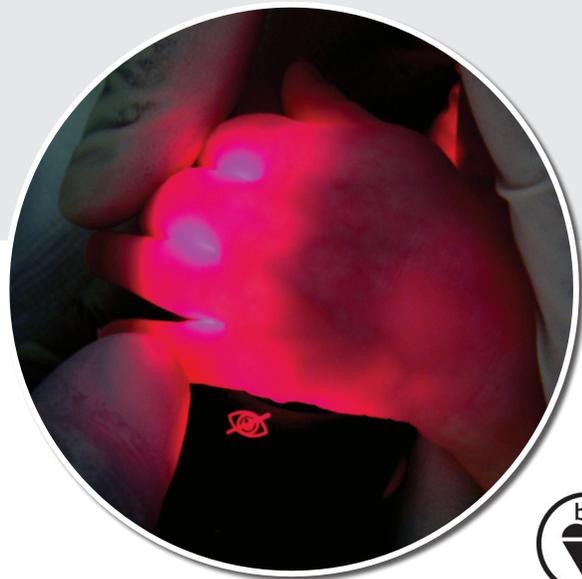

Veinlite PEDI is our smallest and most compact vein finder model. It is optimized to find veins using the traditional through-the-body transillumination technique and also by the patented* side-transillumination method. It can be used anywhere on the body, even on the scalp. With the Veinlite PEDI, veins can be mapped to avoid valves or bifurcations and find the best place for safe access.

- Clinically proven Veinlite® technology*
- Meets INS and CDC Guidelines for infection control
- FDA and CE registered

BENEFITS

- Fewer IV access failures
- Less wasted supplies
- Improved patient satisfaction
- Small and compact design

TransLite, LLC Veinlite® Transilluminators
Designed and manufactured in the USA.
